## About Me

Dedicated React JS Developer with a solid understanding of front-end development.Highly skilled in implementing responsive designs and optimizing website performance.Highly skilled Laravel Developer with a strong background in CSE. Proficient in HTML & CSS, JavaScript, and experienced in developing web applications using Laravel framework. Seeking a challenging position in React development to utilize my skills and contribute to the success of the organization.

## Professional Experience

Unicorn Software And Solution

*2022 – Present*

Key responsibilities:
- Designing, coding, testing, and debugging web applications using Laravel and PHP.
- Integrating user-facing elements developed by front-end developers with server-side logic, ensuring high performance and responsiveness.
- Creating and integrating RESTful APIs for communication between front-end and back-end systems, often involving JSON or XML data formats.
- Identifying and addressing performance bottlenecks, optimizing code, database queries, and server configurations for faster load times and improved user experience.
- Participating in code reviews to maintain code quality, share best practices, and ensure adherence to coding standards.
